

Software Development Engineering Internship

Software Development Engineering in Test • 0 year • FullTime • Bangalore

About Autonomize AI

Autonomize is on a mission to help organizations make sense of the world's data. We help organizations harness the full potential of data to unlock business outcomes. Unstructured dark data contains nuggets of information that when paired with human context will unlock some of the most impactful insights for most organizations, and it's our goal to make that process effortless and accessible.

We are an ambitious team committed to human-machine collaboration. Our founders are serial entrepreneurs passionate about data and AI and have started and scaled several companies to successful exits. We are a global company with expertise in building amazing data products, captivating human experiences, disrupting industries, being ridiculously funny, and of course scaling AI.

The Opportunity

We're looking for a highly motivated **Software Development Engineer Intern** to join our engineering team. You'll have the opportunity to work on real-world projects, gain experience across the software development lifecycle, and contribute to products that have real impact. This internship is ideal for someone passionate about building software and eager to grow in a collaborative environment.

What You'll Do

- Design, develop, and test software features and components
- Collaborate with cross-functional teams to define and implement solutions
- Write clean, efficient, and maintainable code
- Participate in design and code reviews
- Debug and troubleshoot issues across the stack
- Contribute to documentation and knowledge-sharing initiatives

You're a Fit If You Have

- Currently pursuing a degree in Computer Science, Software Engineering, or a related field
- Proficiency in at least one programming language such as Python, C++, or JavaScript
- Familiarity with data structures, algorithms, and software design principles
- Strong problem-solving and analytical skills
- Eagerness to learn and take on new challenges
- Good communication and teamwork abilities

Bonus Points:

- Experience with version control (Git)
- Exposure to web development or backend systems

Autonomize

- Familiarity with cloud platforms (AWS, GCP, or Azure)
- Side projects, open-source contributions, or hackathon experience

What we offer:

- Influence & Impact: Lead and shape the future of healthcare AI implementations
- Outsized Opportunity: Join at the ground floor of a rapidly scaling, VC-backed startup
- Ownership, Autonomy & Mastery: Full-stack ownership of customer programs, with freedom to innovate
- Learning & Growth: Constant exposure to founders, customers, and new technologies—plus a professional development budget

We are an equal opportunity employer and do not discriminate on the basis of race, religion, national origin, gender, sexual orientation, age, veteran status, disability, or other legally protected statuses.
